

## Dragonbreath

What do you have to say?  
The thoughts that get you through your day  
Distracting games you play  
In silence, go away

The words we need from you  
The realest work you do  
The need for love is true  
What will you have done when it's through

I need you near me  
Take a couple days  
I need you near me  
Take the time you need to breathe

Responsibility  
is more than owning a sport utility  
You try to feed your needs  
With plastic tans and DVDs

You only get one life  
It's up to you to do what's right  
Is money everything,  
or simply paper green?

I need you near me  
Take a couple days  
I need you near me  
Take the time you need to breathe

27,000 people die of starvation each day  
You're only fooling yourself if you think you don't have a say  
Your world is yours  
Don't give your turn away  
Heroes, you are a part of history  
As much as you'll let yourself be  
And your world needs you desperately  
To say what you believe  
And I believe that we are all one

You only get one life  
It's up to you to do what's right  
Your world, it's you, it needs  
So like a dragon, BREATHE.
